## VARIMAT V 2 new Software Rel. 1.8 VARIMAT V2的全新软件1.8版

在全新的软件1.8版中,可以方便地达到最大的焊接参数。在低电压下的性能表现大大提升。

在目前的1.7版软件中,通过调整EU插头的设置也无法在230V电压下达到620 的最高温度。

With new software Rel.1.8 the maximum welding parameters are easily achieved. At under voltage the performance has been greatly improved.

With the current software Rel. 1.7 with setting EU-Plug the maximum temperature of 620°C at 230V net power is not reached.

绿色曲线:1.8版软件(调整EU插头配置,全新的功率管理系统可以达到17A的电流) 红色曲线:1.7版软件(调整EU插头配置,没有功率管理系统,电流限制在16A)

Green graph: Software 1.8 (Setup configuration EU-Plug, permitted 17A with new Power management)

Red graph: Software 1.7 (Setup configuration EU-Plug, 16A without Power management)
